Opis

Air freshener in form of sticks. Fragrance enclosed in an elegant, glass bottle will take care of long lasting freshness of your rooms, discreetly supplementing the interior design. The intensity of fragrance can be

adjusted with sticks. The more are immersed in the essence, the more distinct the fragrance.

Directions: 1. Screw the cap off and remove the plastic plug. 2. Screw the cap back on. 3. Place 1 to 3 sticks inside the bottle. Position the bottle on a flat, stable surface. Prevent spillage of the fluid and the sticks touching other surface. Immediately wipe spilt fluid with damp cloth. The manufacturer will not be held liable for use of the product contrary to the instructions listed on its package. 4. Adjust the fragrance intensity by adding more sticks, or turning them upside down. 5. The more sticks and the higher the room temperature, the faster the fragrance evaporation rate.
